

Dear Ms / Mr.

As the core driving force of the new round of industrial transformation, artificial intelligence (AI) is profoundly changing the way people produce and live and has played a vital role in leading the development of science and technology. Everything is constantly connected and becomes highly intelligent. More industry changes and innovations will be brought by the further evolution of AI and the development of next-generation information technologies such as mobile Internet, big data, cloud computing, and high-end chips. Because of the rapid evolution of AI, the future has been refreshed with new ideas, new concepts, new theories and new technologies propping up, becoming an important source of the future science and technology revolution.

Under the strong support of the Ministry of Industry and Information Technology of the People's Republic of China and the Guangzhou Municipal People's Government, the Canton Tower Science & Technology Conference (STC) 2019, that is, Global Developers Conference and Artificial Intelligence Summit Forum, jointly sponsored by IDG Asia and Guangzhou Municipal Science and Technology Bureau, will be held in Guangzhou on October 11-12, 2019.

The STC 2019 consists of a main forum, 14 parallel forums, a think tank closed-door meeting, venture capital dinners and awards dinners. With the theme of "Hail Technology!", it will focus on the opportunities and challenges brought by the industrialization of AI, and act as a platform where the latest development trend of information technology and intelligent terminal industry chain will be comprehensively interpreted, and frontier theories and policy orientation of AI will be discussed and shared. Therefore, the STC 2019 plays an active role in accelerating the sound development of high technology and mobile Internet industry in the Guangdong-Hong Kong-Macao Greater Bay Area, inspiring the in-depth thinking and layout of the development of AI, and commonly seeking new impetus for the development of AI industry.

As the venue of the STC, Guangzhou is also the core growth pole in the Guangdong-Hong Kong-Macao Greater Bay Area. For many years, in the information technology industry, it has adhered to the implementation of the planning management reform, the synergistic innovation system which combines the efforts of enterprises, universities and research institutes, and the sharing of government information as well as the construction of tech business incubators. As the most authoritative and influential event in science and technology held in China, the STC serves as an important platform for cooperation between global sci-tech and cultural innovators, based in Guangzhou and radiating to major countries and cities around the world.

The most cutting-edge and true voice of the global “science and technology+” industry will be shared in this STC, evidenced by the world’s top lineup of guests, in-depth topics concerning AI, industry-leading perspectives, the profound analysis of industry trends, the integration of innovation technologies and practical experience, and face-to-face talk between experts, enterprises and users.

In view of your professional knowledge, foresights and strong influence, we sincerely hope that you will take the time to attend the Canton Tower Science & Technology Conference 2019, and attend the main forum as a panel guest speaker and the think tank closed-door meeting to share your insights and discuss the overall development of the industry.

We are here in Guangzhou, City of Flowers, looking forward to your visit to enjoy this grand event in this golden October.

Hugo Shong, Co-Chairman of IDG Capital  
Organization Committee of Canton Tower Science & Technology Conference  
Sept. 2019

\* Special note: The organizing committee will bear all travel expenses.
